

# Investment Options

@ *Bio Suisse* Certified Organic Production on 2,000+ ha

crop production, warehousing and processing, hunting range  
exporter to the EU and CH markets  
quality retail packaged grains and flours from proprietary mill

Bela Crkva, South-Banat, Vojvodina, Serbia  
area best known for orchards and vineyards,  
nested in-between 3 nature parks

## Location

*Bela Crkva* [White Church] is a quiet Danube municipality nestled between 3 national nature parks, within 90 min driving distance from Belgrade airport, at the brink of the EU-Romanian border. The region features an impressive landscape and absence of industrial pollutants. **2,114 ha** of Ecoagri fields are largely lining the border between Serbia and EU-Romania.

Term "*organic*" (product) promotes the idea of food production being a unique and harmonic organism.

Such attitude *excludes* utilization of pesticides, heavy metals, additives, preservatives, emulsifiers, artificial colors and flavors, antibiotics, hormones, pharmaceuticals and GMO.

Our agricultural company is specialized for organic farming of crops and oil-plants and as such *Bio Suisse* certified. Product portfolio achieved is a result of complete dedication, faith in own capabilities and perseverance.

### Ecoagri Serbia

2.114 ha

Long: 21° 25' 02.00" E

## Position & Climate

Insulated by forests, roads and drainage channels, our land plot is located on the wavy surface terrains with elevations of 83-125m. Characteristic are winds from SE (strong, dry and squally) and NW (bringing rain with average annual readings of 600-700mm). Climate is mildly continental with long, warm summer, colder and sometimes cold and snowy winter, shorter spring and warmer fall.

## Infrastructure

Our managerial, professional and technical capacity is proven through an impeccable history of exports to EU-Germany and Switzerland. Our storage is the only bio-certified facility in the wider region; it includes a 13,500t silo and a 1,600sqm ground storage, situated next to the railway, in proximity of a dedicated ship loading spot-on.

## Development

We are further diversifying farming portfolio, processing crops into a wider range of packaged products. Our plan is to extend existing processing facilities, enter co-operations with partners as well as further business segments such as fruits & nuts and animal farming.

## Certificates & Financials

BIO SUISSE  
ORGANIC

Consolidated operations, including the aforementioned land plot and storage capacities have, after a 3 year long conversion process successfully obtained the bio/organic status by receiving certificates OCS RS 001, EU-Bio and especially *Bio Suisse* in 2015 and 2016.

Organic production is not yet subsidized in Serbia. As a pioneering company in the business, we needed to endure financial losses during the conversion period. The business results in years 2016 and 2017 were however gratifying.

Positive capital reserves, development and co-operation potential as well as synergies through vertical integration are substantial and may upon request be presented in detail.

## Soil & Irrigation System

Soil type is *Smonica* - fertile, rich in humus and packed, optimal for fruits and field crops alike. Powerful humus-accumulative layer depth is 60-120 cm. The soil is of a heavier mechanical structure, II-IV cadaster class. Irrigation includes 3 linear Valmont Valley devices with 500m individual width and 3,000m length and covers 450ha. We irrigate additional 100ha by sprayers. Quality water is drawn from *Karaš* off-mountain river via underground pipes. We are further expanding the surface under irrigation.

## Fulfillment by Investment

- Investment in perhaps the real only property (w/o depreciation)
- Healthy, organic soil on large piece: a scarce resource in Europe
- Farming, storing and processing organic grains is a savings and price speculation instrument
- Experienced management and personnel
- Energy potential: biomass, wind, solar
- Diverse expanding portfolio
- Direct-2-Customer marketing objective
- Numerous development projects
- Enhancement of personal lifestyle
